

**DEPARTMENT OF IMMUNOHAEMOTOLOGY**  
**&**  
**BLOOD TRANSFUSION MEDICINE**

Our aspiration is to make the Department of Immunohaematology and Blood Transfusion Medicine, GMC Kathua a state of art blood bank. We want it to be recognized as a center of excellence that focuses on leadership, best practices, research, support and training. We are in a process of establishing a full fledged blood component lab. alongwith aphaeresis so that PRBC's , FFP, Platelets and cryo shall be provided to the patients. Rational use of blood shall also be ensured to reduce unnecessary and unsafe transfusions and to improve patient outcome & safety.

Last but not the least 100% collection of blood from voluntary donors is our prime moto by organizing both indoor & outdoor blood donation camps.
